## The National Alliance of Advocates for Buprenorphine Treatment Patient/Physician Matching System.

### • Physician Instructions •

### What Is the NAABT Patient/Physician Matching System?

This system is a centralized, strictly confidential way for physicians to select and contact patients as treatment openings become available in his or her practice.

This web-based system offers patients in need of Buprenorphine treatment the opportunity to anonymously register and, in effect, be on the waiting lists of all participating certified physicians in their geographic area.

### Advantages to the Physician:

- Potential patients are screened through a 16-question registration form
- 24/7 access to a continuously updated list of potential patients
- Email alert option as new patients register
- Patients are required to renew their status every two weeks if not contacted
- Potential patient is notified by email to contact you for an appointment
- A larger pool of potential patients
- Reduced office time spent:
  - In maintaining your own waiting list
  - Placing phone calls to reach potential patients

### Advantages to the Patient:

- Receives care more quickly
- Complete anonymity and confidentiality
- One-time registration allows patients, in essence, to be put on the lists of many physicians at once
- Registration can be done by a counselor or advocate
- At no time is any identifiable information made visible
- Patient is notified by email, thereby maintaining added confidentiality
- No daily calls to physicians checking for openings
- 24/7 access

Statement to Physician: Very opiate dependant, I tried methadone maintenance and stayed on for almost 2 years, but really didn't like how I felt. I got on Suboxone maint. for a year (2006) - worked so well for me. I have medicaid (title 19) ins. I paid the Dr. direct (wasn't covered) stop as I could no longer afford the tx. Subox. is the only thing that has really worked. I need to get back on maint. ASAP. Please help!

The intent of this site is to efficiently connect patients in need of treatment for opioid dependence with an Office-Based Treatment Provider, certified to prescribe Buprenorphine. It is unlawful to use this site to solicit for anything other than stated. Example: it is inconsistent with the terms to use this site to solicit for "rapid detox", "inpatient rehab", or any other treatment that is not considered Office-Based Opioid Dependence Treatment with Buprenorphine; and such treatment must be consistent with the physician training established to obtain the DEA waiver to prescribe Schedule III medications for opioid dependence in an office-based setting according to DATA2000. If you do not have an "X" number from the DEA, you are not authorized to use this patient database.
